Bala Subramanyam Lanka

Senior Software Engineer at IBM · HashiCorp

I build secure, dependable backends. Over the last decade that has meant OAuth 2.0 and JWT platforms, fraud-detection microservices, rule engines and, today, secrets and access management with HashiCorp Vault and Go.

13+
years shipping production software

10
Spring Boot microservices owned for fraud detection

25%
lower latency from tuning and query optimization

8
engineers led as a team lead

WHAT I BRING

Security & identity
OAuth 2.0 frameworks with Spring Security, JWT-based API security, and now secrets, provisioning and authorization with HashiCorp Vault.

Backend & APIs
REST APIs with Spring Boot and Jersey, runtime services in Go, Kafka producers and consumers, webhooks and the plumbing that keeps them reliable.

Cloud & platforms
Moved microservices from Pivotal Cloud Foundry to OpenShift with minimal disruption, scaled services on OpenShift and AWS, and standardized CI/CD with Jenkins.

Business rules
Years of IBM ODM and ILOG JRules: BOM modeling, rule authoring, the Rete algorithm, and migrating ODM 8.6 applications to 8.10.

Performance
PostgreSQL tuning, load testing and a bandwidth-saving throttling algorithm for connected devices. I like making things measurably faster.

Leading & mentoring
Technical lead for offshore teams, mentor to newcomers and a regular in architecture, estimation and planning discussions.

EXPERIENCE

IBM — Toronto, Canada

Senior Software Engineer, HashiCorp Secure — Jun 2026 – Present · 5 mos

- Build runtime services and backend components in Go for Secure Hub, Secure Runtime and Vault.
- Integrate and automate HashiCorp security products, including secrets and access management.
- Improve secure production workflows across provisioning, authorization and service reliability.
- Deliver scalable, secure and compliant platform capabilities for enterprise environments.

Cognizant — Toronto, Canada

Senior Software Engineer III — Oct 2022 – Jun 2026 · 3 yrs 9 mos

- Owned and evolved 10 Spring Boot microservices behind fraud-detection workflows, each handling about 2–20 TPS in production.
- Technical lead and hands-on contributor, guiding offshore teams while driving design and implementation decisions.
- Led the migration from Pivotal Cloud Foundry to OpenShift Container Platform with minimal production disruption.
- Cut application latency by about 25% through performance tuning, PostgreSQL query optimization and targeted load testing.

- Designed and enforced JWT-based authentication and secure API practices aligned with enterprise cybersecurity standards.
- Owned scaling strategies across OpenShift and AWS, and standardized builds, tests and deployments with Jenkins CI/CD.
- Worked with QA, upstream consumers and downstream DMP / FICO decisioning platforms to keep end-to-end processing reliable.

CGI Toronto, Canada

Senior Consultant Aug 2021 – Oct 2022 · 1 yr 3 mos

- Migrated IBM ODM 8.6 applications to 8.10, building new Kafka consumers and producers to support the move.
- Translated business requirements into Java XOM objects and rules alongside business units.
- Built Java microservices to support the migration of legacy systems.
- Planned, built and documented applications for internal teams and clients, and supported new rules in production.

Netradyne Bengaluru, India

Senior Consultant Apr 2020 – Mar 2021 · 1 yr

- Built and maintained secure REST APIs with Java, Jersey, Spring Boot, AWS and Postgres.
- Worked on Kafka streams (consumers and producers), and architected, built and documented webhooks.

Senior Software Engineer Jul 2019 – Dec 2019 · 6 mos

- Centralized authentication and authorization across the product with OAuth 2.0 and Spring Security.
- Designed the throttling algorithm that minimizes the internet bandwidth devices use to talk to the servers.
- Designed and built a soft-rollout mechanism for over-the-air updates.

Software Engineer Mar 2018 – Jun 2019 · 1 yr 4 mos

- Built secure REST APIs and shipped Angular features, simplifying the UX through close work with product.
- Architected and built Ops-Dashboard, an internal full-stack tool for the operations team.

Zeta Global Grisaille AdTech Solutions, Zeta Global Technology Excellence Center · Chennai, India

Software Engineer Sep 2017 – Mar 2018 · 7 mos

- Built secure REST APIs with Java, Node.js, Spring Boot, AWS and MySQL.
- Built automation for customer support teams that cut ticket resolution time by 14%.
- Practiced test-driven development, reaching 85% code coverage.

Cognizant Chennai, India

Programmer Analyst Jun 2015 – Sep 2017 · 2 yrs 4 mos

- Team lead for a team of 8: defect analysis, production handover and component integration testing.
- Mentored newcomers and ran code reviews.

Programmer Analyst Trainee Apr 2014 – May 2015 · 1 yr 2 mos

- Built 43 SOAP web services and their business rules with J2EE, XSLT and IBM Operational Decision Manager.
- Worked directly with the client on requirements, defect analysis and status.

Adaptavant Chennai, India

Junior Software Engineer Aug 2013 – Mar 2014 · 8 mos

- Built REST APIs and web apps with Java, RESTEasy, Spring MVC and Google Cloud, and moved the APIs to Google App Engine.
- Created a JavaScript library for chat and analytics across websites, plus a visitor-statistics module.
- Spoke at SYK (Spread Your Knowledge), the company's internal knowledge-sharing sessions.

Intern

Dec 2012 – Mar 2013 · 4 mos

- One of 3 interns, out of 50, offered a full-time role.

TOOLBOX

LANGUAGES	Java · Go · Python · JavaScript · SQL · C# · C++
FRAMEWORKS	Spring Boot · Spring Security · Jersey · Angular · Django · IBM ODM · ILOG JRules
SECURITY	OAuth 2.0 · JWT · HashiCorp Vault · Secrets management
CLOUD & DEVOPS	OpenShift · Kubernetes · Docker · AWS · GCP · PCF · Jenkins
DATA & MESSAGING	PostgreSQL · Oracle · MySQL · Kafka
AI	AI application development · Prompt engineering

EDUCATION

AEC, Information Technology – Programmer Analyst
Collège LaSalle, Montréal · 2020 – 2021

B.Tech, Computer Science Engineering
Jawaharlal Nehru Technological University, Kakinada · 2009 – 2013

CERTIFICATIONS

Certified SAFe Practitioner

Spring: Spring Data 2

Java Concurrency Troubleshooting: Data Access and Consistency

Angular Essential Training

Building Modern Projects with React

Speaks English (professional) and Telugu (native).
